Information

The following will increase your risk of contacting STI and BBV:

- **Coming into contact with menstrual blood during sex**
- **Not using lubrication during sex**
- **Not using a condom**
- **Not using a condom correctly / or appropriate condom**

Do you know how to use a condom effectively to prevent blood borne viruses?

- **Check expiry date (it is not safe to use if it is out of date)**
- **Be careful not to tear or snag the condom when opening the packet**
- **The condom must be put on the erect penis before any sexual contact (not just before ejaculation)**
- **The condom must be rolled down to the base of the penis when being put on while holding the teat at the top (or leave half an inch at the top if there is no teat)**
- **After ejaculation the condom must be held in place while the penis is withdrawn to prevent the condom from slipping off**
- **Each condom must be used only once**
- **Only water based lubricants (such as K-Y jelly) should be used**
- **Anal sex requires stronger condoms**

Above points covered Yes No
